KNIVES ONLY, set of SIX, red or ivory handles **\$1.65** Per Set.

STAINLESS STEEL KNIVES & FORKS, extra large ivory handles, beautifully finished **\$4.50** Per Set of SIX.

THERMOS BOTTLE, special price for Week End **55¢** Each.

1-GAL. PICNIC & OUTING JUGS, keeps food Hot or Cold **\$2.25** Each.

HOME BUILDERS' HARDWARE CO.
R. N. Barnhill, Manager
BLAIRMORE ALBERTA

One day last week, when the mercury went up to 108 above, we had the pleasure of going down six inches below in the South Fork river. No damage was done.

Mrs. J. Dufour, of Fernie, had a narrow escape from being scalped recently, when her hair became entangled in an electric wringer. Our advice: get it cut Aberhart style.

C.P.R. employees of the Medicine Hat subdivision will picnic at Bassano on July 30th, when a special train will be run from the Hat, with between 1200 and 1500 men, women and children.

A most interesting piece of reading matter was contained in last Saturday's Social Credit supplement to The Calgary Alberta—Rules of the proposed Credit Unions. Read it, then laugh!

EDGAR RHYNS FETED AT CALGARY BY VETERANS

Edgar Rhys, well known Calgary vocalist, and formerly of Hillcrest, was tendered a farewell party at the Imperial Veterans' Association (B.E.S.L.) clubrooms at Calgary on Friday night last, on the eve of his departure to make his home in the Old Country.

On behalf of the club, Dick Richards, president, presented Mr. Rhys with a silver cigarette case, suitably engraved and bearing the emblem of the Canadian Legion, B.E.S.L.

He expressed regret at the departure of Comrade Rhys, who had been a valuable member of the club executive for several years before taking over the management some years ago, and wished him every success in his activities in England.

James Logan, manager-secretary of the club, also thanked Mr. Rhys for the assistance afforded in the past few weeks.

Dia Morgan, Alberta provincial representative and second vice-president of the Dominion Command, Imperial Veterans in Canada Association, B.E.S.L., also spoke briefly and thanked Comrade Rhys for the work he had done on behalf of ex-Imperial veterans at present residing in Alberta.

Out of town visitors included Ernest Rhys, J.P., Ken Rhys, Glyn Rhys, Wilfred Rhys and Hedley Rhys, of Hillcrest, and other former Imperials.

Mr. Rhys visited his brothers in Hillcrest this week and met many old friends throughout The Pass. Returning to Calgary, he will leave in a few days for England.

L. C. Wilson, of Calgary, is a business visitor to Blairmore this week.

BLAIRMORE SPORTS ASSN. TO STAGE FIRST OUTING

We understand that plans have been made whereby members of the Blairmore Community Sports Association, members of their families and others interested in the 1938 sports programme in Blairmore on July 1st, are to take part in a picnic outing on Sunday next to Waterton National Park.

Cars, provided by members and friends, plus trucks, will be available at 8 a.m. on Sunday. Those planning to go are required to get in touch with Sam McDowell or some other member of the executive re transportation.

And, remember, this is absolutely a community movement, in which all who can are required to help out.

MOTHER SHIPTON A GREAT PROPHET

Aberhart never question that there was a greater prophet than he. Take for instance, the prophecies of Mother Shipton, and she never did boast of being holier than thou or a great bible student. She was born in Yorkshire, England, in July, 1488. She made numerous predictions, such as motor cars, aeroplanes, submarines, telephones, iron ships, etc., but one of the most remarkable of her predictions was:

"And now a word in uncouth rhyme, For what shall be in future time; For in those wondrous far-off days, The women shall adopt a craze To dress like men and trousers wear And cut off all their locks of hair. They'll ride astride with brazen brow As witches do on broomsticks now. The love shall die and marriage cease And nations wane as babes decrease. The wives shall fondle cats and dogs, And men live much the same as dogs."

And men live much the same as dogs.

WARNING TO BRIDGE PLAYERS

An amusing incident is told in the St. Mary's Journal, that is a hint to those who press a point too far. Four ladies were playing bridge, and one of them—Madame X—was a great stickler. It was her turn to deal, and she placed the cards in front of her opponent to be cut. The lady on the right, busily talking, picked off the top half of the deck and laid it down beside the remainder of the pack.

"You must complete the cut," commanded Madame X.

"Oh, I have cut them," murmured the other, hastily, still engaged in conversation.

"But you didn't complete it," insisted the other. "You must place the bottom half on the top before you have finished it."

It was one of those trivial incidents in which one word leads to another.

Madame X was thoroughly stirred when she promptly sought the bill for the card she had cut off a letter to Mr. Culbertson, asking for his ruling.

With admirable promptness, the bridge master replied: "Madame X was right. A cut must be completed. Enclosed Madame will find Mr. Culbertson's bill for \$10.00 for professional advice."

Madame X was so enraged at this charge, that she promptly sought the advice of a lawyer. He advised her that she had put herself in a position where she could be sued for the bill.

And at the end of the month she got another bill, this time from the lawyer, for \$10.00 for professional services rendered.

It has become common knowledge that the Premier does not like heckling. He avoids debate, even in the legislature. He likes to have the whole say, and dictate the last word on almost any subject. In his profession as a teacher, he expounded without contradiction, but he has found out that in public life his path is not so rosy, nor his utterances accepted so unquestioningly—Bassano Recorder.

FINANCIAL STATEMENT OF BLAIRMORE COMMUNITY SPORTS ASSOCIATION

Following is a statement of receipts and disbursements of the Blairmore Community Sports Association, as compiled by Mr. W. H. Chappell, and audited as correct:

RECEIPTS

Cash Donations—Bellevue Bakery, Rex Cafe, Royal Cafe, Cole's Theatre, Blairmore Pharmacy, Charles Sartoris and C. J. Tompkins, \$5 each; P. Chardon, Excel Builders Supply Co., \$2 each; Canadian Legion, B.E.S.L., Deliveries Limited, F.M. Thompson, Co. and Crows' Nest Pass Motors, \$10 each; Greenhill Hotel and Cosmopolitan Hotel, \$20 each; Blairmore Enterprise, Mark Sartoris, Red Trail Motors and Central Meat Market, \$8 each; Martin Kubik \$1, Blairmore Town and School \$75.—Total \$207.00.

Donations of goods, material and advertising—Prizes: P. Colombo, John Kubik, Blairmore Hardware Co. \$5 each; S. Trono \$3, W. L. Evans \$2, Lake of the Woods Milling Co., Pass Home Furnishing Co. and Robin Hood Floor Co. \$2.25 each; Home Builders Hardware Co. \$2.50.—Total \$29.25. West Canadian Collieries' Limited (lumber for repairs) \$24.75; Pass Daily Herald (donation on account, advertising) \$3.25; Blairmore Enterprise (donation on account programs) \$2.75.—Total \$33.75.

Tag Sales: Tags sold, \$187.60, less commission \$18.25.—\$169.25.

Dance receipts: \$141.50, less expenses \$28.10.—\$113.40.

Collection, July 3rd, \$19.40.

Total receipts \$538.34.

EXPENDITURES

W. C. C. Limited (lumber donated) \$24.75; Excel Builders Supply Co., lime cement, etc., \$15.75; Amateur Union, affiliation and sanction fees, \$10.00; Bellevue Band \$25.00; Meals for handmen \$11.00; Prize List (total tickets \$293.25, less discount of \$12.35) \$280.90; Blairmore Enterprise (adv. \$10.00, tags \$8.75, posters \$11.00, programmes \$11.00, ribbons \$3.50) \$44.75; Pass Daily Herald (adv. \$6.50, extra posters for July 3rd \$5.00) \$11.50; F. M. Thompson Co., flags, twine, pins, \$2.17; Kerr Bros., Bellevue, blank shells, 85 cents; referees (Montabetti \$5.00, Olson \$5.00, Link \$4.00) \$14.00; Perzack, cutting grass, \$3.00; R. Oliver (trucking, etc. \$10.00, gas \$1.80) \$11.80; Fresenius & Pagnucco, drying, etc., \$9.00; baseball expense (boys \$2.25, balls \$26.07) \$28.32; softball expense, balls, \$13.05; wire netting \$16.50; staples 60 cents; paint 45 cents; wire 15 cents; repairing top watch \$3.00; man on ticket booth for members \$4.00; total expenditure \$531.14, less credit, baseballs on hand valued at \$20.00; net expenditure \$511.14.

Total Receipts \$538.35
Total Expenses \$511.14
Surplus \$27.21

In submitting the above report on the financial affairs covering the Field Day of July 1st, it will be noted that no account has been taken of the expense of \$100 which was voted for John Chala as groundsman by the general committee before the sports committee went into action. However, an amount of \$78.50 has been spent by the sports committee for lumber, wire netting, cement, etc., on permanent improvements on the grounds, and this work will benefit the use of the sports grounds for several years.

The Fernie Board of Trade carries a most sound-sense advertisement in The Fernie Free Press, worded: "Stop! Don't dig gasoline, we dig coal. We don't! Listen! You are wrecking the coal industry when you bring in goods by truck. Use the railways—the best friends the coal business has." We would draw the above to the attention of many business people and others in this district. Where would they be if the coal mines were not operating?

10,000 BOOKLETS ON VALUE OF ALBERTA TOURIST TRADE

Value of the tourist traffic to Alberta is revealed in a new booklet entitled "Gold In The Rockies," which is now being distributed through various mediums, including oil companies, U.F.A. locals, secretaries of municipalities and various other organizations.

The booklet contains a wealth of material dealing with aspects of the tourist business, what this means to the farmer in developing a cash market, and showing further how necessary it is to develop a system of hard-surfaced highways in Alberta. It reveals that only by the building of such a system of highways will the lucrative tourist business be brought to the farmer's door.

Full publication of the article has been given in Voice of Motordom, official organ of the Alberta Motor Association. The A.M.A. has campaigned for some years in the interests of better highways and greater tourist trade.

Publication of the booklet is another aspect of the drive to open new markets for Alberta farmers. It is believed that the potential market lies to the south where there are millions of tourists ready to buy Alberta and other Canadian farm products on a retail basis, providing that hard-surfaced highways are built to accommodate this tourist trade.

ON THE OLD ZAMBEZI

THEY TALK ABERHART

W. J. Oliver, who has just returned from a photographic expedition to Portuguese East Africa, reports an odd incident of his trip. The party was travelling along the Zambezi river and came to a solitary outpost, source of miles from any outside contact. It was considered courtesy to pay a call on the Portuguese commandant at the post. After some conversation, the commandant remarked to Mr. Oliver "You are a very long way from home." Continuing, he said, "You come from that country which has that curious Mr. Aberhart in control." Admitting this, Mr. Oliver asked: "How in the world did you hear of Mr. Aberhart?" and the commandant explained, "I read the Lisbon papers and they have carried quite a few stories of his extraordinary theories."

"Do you understand the theories?" asked Mr. Oliver. "No, I don't. I have tried, but they are beyond me. However, anyone trained to deal in figures knows that figures can be juggled very cleverly to look like something very different from what they actually are."

Well, anyway, down in darkest Africa they are trying to understand Aberhart, and even they cannot see light—High River Times.

Peter Farmer, who for the past year has been at the Massachusetts Institute of Technology, after completing studies at Alberta university, was home for a brief holiday, and will go to the Aldermac Copper Corporation operations in northern Quebec. C. F. Boland, of Noranda, and A. W. Boland, of North Bay, who accompanied Peter from New York to the Pacific coast, are guests at the Farmer home here. They will be continuing east in a few days.

Pete Mathus, who about nine months ago met with an accident that nearly ended fatally, remarks that he had got so near the pearly gate as to be able to peep in. He was more than surprised at the class of people he saw there—many old timers he had figured were better qualified for the other place. St. Peter, too, expressed surprise at the audacity of a man like our Pete ever hoping to get in at that gate. St. Peter simply batted him over the eye, and warned him to go away back and sit down.

"Serve the Church that the Church May Serve You."

CENTRAL UNITED CHURCH BLAIRMORE

Rev. E. B. Arrol, R.A., Minister

11 a.m.—Senior and junior Sunday school.

7.30 p.m.—Public Worship.

Wednesdays at 8 p.m.—Prayer Service.

ST. LUKE'S CHURCH NOTES

Rev. J. R. Hague, Rector

Services Sunday next: 10.00 a.m.—Sunday School.

11 a.m., Morning service.

REGULAR BAPTISTS

Pastor J. W. MacDonald, Minister

In the Union Hall.

Services Sunday next: 11 a.m.—Senior and Junior Sunday school.

7.30 p.m.—Evening service.

Thursday, 7.30 p.m.—Prayer and Bible study.

You are cordially invited to our services.

THE SALVATION ARMY

Captain Hewitt - Coleman, Alberta

Sunday services: Directory class at 10.30 a.m. Sunday school 3 p.m. Salvation meeting 7.30 p.m. Come and enjoy an hour in God's house.

Monday, 7 p.m.: Home League, all ladies are heartily invited to attend.

Friday, 7 p.m.: Young people's meeting.

CHURCH OF THE NAZARENE

Main Street West, Coleman

Pastor, Rev. C. Helen Mooshian, B. A.; assistant and organist, Gunnell Berglund.

Sunday services—Sunday School at 11 a.m. Morning worship at 12 noon.

Evangelistic Service at 7.30 p.m.

Tuesdays, 7.30 p.m., Prayer Meeting, Fridays, 7.30 p.m., Bible Study. Strangers and visitors always welcome.

THE MISSION WAS ORGANIZED INTO A Church a week ago, with nine charter members.

Colonel G. S. Harrington, former premier of Nova Scotia, will leave Halifax shortly for Australia to attend the British Commonwealth Relations conference. He will be accompanied by Mrs. Harrington. They will sail from Vancouver. They plan to return home by way of India, the Mediterranean and England.

Referring to the Aberhart meeting in Okotoks, the Review states: The premier stated in Edmonton that the meeting was wrecked by a few rowdies. Among those he chases as "rowdies," he might be surprised to find that there were some of the best farmers in the district, men who are quite his equal, if not superior in every way, except that they are not of Prussian-German parentage and are handicapped that they have to speak the truth. Heckling has always been recognized as perfectly legitimate and lawful at a publicly-called meeting, and if Premier Aberhart can't take it, he'd better go back to his desk in the parliament buildings and stay there. Two things were very satisfactory at the meeting—the audience didn't throw any over-ripe eggs, and Able didn't tell any of his over-ripe stories.

WORLD HAPPENINGS
BRIEFLY TOLD

Miss E. Vermilyea, Campbellford, Ont., claims a world record as a teacher. She has taught since she was 16 years old, a total of 66 years.

A 12-foot Indian python reported missing from a London house and for which police searched was found asleep behind a wardrobe in the house all the time.

One hundred and thirty convicts from the Kingston penitentiary have been distributed among western Canadian penitentiaries. The Kingston penitentiary was overcrowded.

Miss Ada Lent of Edmonton, Alta., was named president of the British Empire Club at the annual meeting held in International House, New York. Miss Jessie Caselman, Vancouver, was elected secretary.

Dr. Charles R. Dickinson, 79, one of the earliest experts of X-ray, who was blinded by exposure to its ultra violet rays and in 1914 founded the Canadian Institute for the Blind, died recently in Toronto.

There were 40,800,000 pounds of creamery butter produced in Canada in June, an increase of seven per cent. over June, 1937; 41 per cent. May, 1938, a Dominion bureau of statistics report said.

Venezuela, member of the League of Nations since 1920, has resigned, giving no explanation of her action. Resignation from the League of Nations becomes effective two years after formal notice is given.

Prospects at present were for a good year in the packing industry, President J. S. McLean told shareholders at the annual meeting of Canada Packers, Limited. Directors were re-elected and reports adopted.

Check On Firearms

Registration Of Revolvers And Pistols Is Made Necessary

Royal Canadian Mounted Police headquarters issued a statement urging the public to co-operate in enforcing the new amendment to the criminal code with registration of revolvers and pistols which was passed at the recent session of parliament.

The amendment requires persons possessing revolvers or pistols to register them between March 1 and July 1, 1939, and periodically every five years thereafter. In 1934, when registration of weapons was first made compulsory by parliament, no provision was made for a periodical re-registration.

The amendment, the statement said, will have "the effect of helping the public to decide whether they really desire to retain as souvenirs or for the sake of protection, pistols and revolvers which may be stolen, and therefore may be a source of danger rather than protection. The law compels the registration of all pistols and revolvers, whether held as souvenirs or for any other purpose. In Great Britain, all dangerous weapons of this kind must be re-registered every three years."

The firearms registration section has proven fruitful to various police forces throughout the Dominion in identifying firearms found in scenes of crime or on persons arrested, the statement said.

Number Is Growing

Specialist Advises Six Meals Daily But Less Food

Science is undermining another ancient creed. The rule about not eating between meals has been questioned before this. One specialist at the Ottawa meeting of the Association for the Advancement of Science now says definitely six meals a day. This means, as our mathematically minded readers will see at once, the 42-meal week, or something more than a meal per hour of work. Perhaps this is as pleasant a way as any of meeting the challenge of the new leisure.

There is one drawback. The specialist at Ottawa says six meals a day, but a total of only two-thirds as much food as one consumes now. But that, too, will be adjusted in time. As science continues to advance with mighty strides, upsetting on its way the science of to-day, we may confidently look forward to a world of to-morrow in which people will be urged to eat eight heavy meals a day.

An Early Mistake

Now that pine trees are being used for making paper and rayon for dresses it was a mistake to cut down the pines on the old homestead to be sawn into lumber, but the land had to be cleared and science hadn't transformed the old pine trees into paper or dress goods in the pioneer days.

Dwarfs were brought to Rome from China as a gift to Marcus Aurelius.

Queerest Horse Races

Have Been Run Half Yearly In Italy Since 1772

One of the world's oldest and queerest horse races, the Palio, was performed in a recent week in the municipal square at Siena, Italy.

Medieval pageantry dominated the scene as banners and costumes of 600 years ago were mingled in the crowds of townsfolk.

Ten horses were chosen by lot to run for the honor of 10 of the town's 17 contrade, or wards. The palio, or prize, is a huge silk banner.

Rules did not prevent the riders from beating one another's horses.

The jockeys rode three times around a brick-paved tilted piazza. Mattresses padded some of the dangerous corners.

Police waited at the finish line to protect the winner from friends and rivals alike. So fierce was rivalry once that inter-contrade marriages were difficult. Such hysteria has passed but families still separate on Palio Day, each member joining the contrade where he was born.

The course has been run uninterrupted twice a year since 1771. It dates back to the 14th century, however, and grew out of other games traceable to the 13th century.

For Firm Action

Anthony Eden Thinks Britain Should Take A More Positive Stand

"It is certainly not true to pretend that for this country to take firm action in defence of its own legitimate interests or of the standards of international decency is to endanger peace," Anthony Eden, former secretary, said in a speech at Stratford-On-Avon.

"There must everywhere be still a reluctance to exceed the dog's bark," he said, "but we hear them bark again. The bark has even become an accepted accompaniment of certain forms of diplomacy. In these conditions it is inevitable that there should be a difference of opinion in this country as to the methods which should be pursued."

"Some of us would have preferred that this country should have taken a more positive line in respect to events in the Mediterranean in the last six months. Whether we were right or wrong is a matter of opinion."

"There is to my mind a preferable course—to make it clear that our policy must be guided by certain principles of international conduct which we have always upheld and from which we cannot depart."

Study The Planet Venus

Scientists Seek Information About This Unknown World

Astronomers of Lowell Observatory at Flagstaff, Ariz., are observing large white clouds on the planet Venus for clues to what is happening on this unknown world which is the earth's twin in size.

"The clouds completely cover Venus. But they change their shapes and shadows from hour to hour, driven by furiously fast winds. With aid of a new method of analyzing their reflected light, they have become colored signals that may reveal the mysterious forces beneath them."

Venus is the next planet inward toward the sun. At times she comes within 27,000,000 miles of the earth. Her diameter is about 7,700 miles. She has sufficient heat to maintain varied forms of life. Although nothing happens on her surface as viewed from telescopes, the clouds hold the key to much fascinating information.

It is apparent already from studies of these clouds with the spectroscopic that a day on Venus is probably more than two weeks long.

Dr. V. M. Slipher, director of the observatory, says the quality of light reflected from Venus' clouds suggests they are made of dust.

Had No Objection

Chicago Policeman Not Afraid To Take Badge Number 13

For sixteen years the custodian of equipment in Chicago has endeavored to give police badge No. 13 to no officer. None would accept it until Marshall Pidgeon, member of the bomb squad, turned in his old and worn star, numbered 6088, and asked for a new one. He was asked if he would take No. 13. "Why not?" he inquired, pinning it on his uniform.

More Spots On Sun

The sun, says Astronomer I. M. Levitt, of the Franklin Institute, is breaking out in a rash again. Levitt said he counted 200 spots on old sun's face and predicted the number for the year might surpass the number visible during 1937, when a 67-year record was broken.

The farm without weeds is either owned and operated by a master farmer, or the soil is so poor that nothing will grow.

SEW A COOL SLENDERER

By Anna Adams

Here's a heat-defying afternoon look to invite superlatives—and plenty of them! You who have "weighty" problems to solve, will feel a glow of satisfaction from the first moment of wearing this new Anne Adams style. For Pattern 4725 is not only simple-as-can-be to make; it is a miracle of slenderizing, flattering fit. And it's decidedly youthful—just to put it on is to lose several years of one's age! Let a cool print—preferably a monochrome and an indistinct design—enhance the fascination of the flared or puff sleeves, the clever pointed yoke that may subtend a flirty jabot or bow, the net panelled skirt. Why not use a silk crepe, a chiffon or velvet? Pattern 4725 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Sizes 36 takes 3½ yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The People Who Smile

Get Along Much Better In World Than Gloom Ones

It's the people who smile who get the best jobs. That is the declaration of Herbert Trevel, grey-haired, kindly-eyed man who interviews hundreds of applicants a week for a big Birmingham business house.

"Smilers stand a much better chance than the gloom ones," he told me.

"It goes so many men and women in my little office every day, as I have done for years, that I can tell at once whether the applicants have got that 'something' that is the different between success and failure."

"And the smile goes a long way towards that 'something'."

So keep smiling. It may get you a rise or a better job.

In nine months Japan has inflicted proportionately as much damage on itself as on China.

RALPH LOOKS RATHER ANNOYED

Defeated by Denny Blunt, left, in a 36-hole match play contest to decide the unofficial professional golf championships of the United States, Ralph Guidahl, national open champion, looked rather annoyed as the two walked off the course at Bingham, Mass.

Prehistoric Man

Discover Oldest Records Of Human Life On This Continent

A wily, acorn-eating fellow who roamed the glacial and volcanic wastes of northern California at least 13,000 years ago apparently was the "dawn man" of North America.

He made only the crudest of tools. None had handles. And if he hunted in the conventional prehistoric manner he left no record of his prowess within reach of the scientific expedition which unearthed his trail.

It found no "dawn man" spear heads. The findings were disclosed by Mark Harrington, head of the joint expedition of the Southwest museum and the Carnegie Institution of Washington, upon completing several weeks of excavating on shores of salty Bodega lake, 60 miles north of San Francisco bay.

Relics of four prehistoric cultures were unearthed on the lake shore, but as in other such discoveries there were no remains of the ancient men themselves. Only crude tools and weapons chipped out of glass-like volcanic rock, called obsidian, and the remains of a bonfire. The "dawn man" knew how to keep warm in that age of glaciers, and perhaps how to cook a little.

The first culture found—was that of the Paleoan man, hitherto regarded as one of the oldest records of human life on the continent—10,000 to 15,000 years.

May Account For Success

Owner Of Paper Empire Never Makes Same Mistake Twice

Eric Gibbe says, in the London Daily Sketch, when a few more signatures have been acquired to a few more documents, Eric Vanittar-Bowater will be the outstanding figure in the whole newspaper world. Less than 20 years ago his business was capitalized at about £100,000.

When the purchase of vast Newfoundland forests is complete his paper empire will be worth £1,000,000. He's only 42, tall (6 ft. 1 in.) and handsome. What does this young paper potentate do with his spare time? He farms. On 250 Surrey acres he raises pedigree hogs, cows and sheep, tries to grow enough to feed them. When he isn't picking hay, he shoots, rides or occasionally plays golf. He's not superstitious, but he never walks under ladders, but it's not superstition. A few years ago some paint fell on his head. He never makes the same mistake twice—which may account for his business success.

Shows Figure Of Late King

One of the lights of a stained glass window that has been given to Winchester Cathedral by Americans, as a tribute to the life and character of King George V., contains a representation of the kneeling figure of the King, wearing the robe of the Order of the Garter.

Singing Mouse Is Dead

Mickey, the singing mouse, is dead. Mickey's songs were stilled in a cage at the home of Mr. and Mrs. Frank Weaver, Olcott, Indiana, where he was "discovered," as he warbled in a closet. Subsequently the mouse appeared on a national radio network.

In Germany there are bee farms where the insects are raised for their poison. It is extracted and sold as a cure for rheumatism.

SUNDAY SCHOOL LESSON

JULY 24

GIDEON: FOLLOWING GOD'S PLAN

Golden text: Have not I commanded thee? Be strong and of good courage. Joshua 1:9.

Lesson: Judges 6:1-35.

Devotional reading: Psalm 98:1-6.

Explanations And Comments

Gideon's Force Reduced by Two-thirds, Judges 7:1-3. Gideon and his band were to fight the Midianites under God's banner, and to God must be accorded the victory. Let them should boast of having themselves defeated the enemy, their numbers must be reduced. Gideon therefore directed all who were fearful to depart, and more than two-thirds of the warriors left the camp. Fearful and trembling, they were lacking in that most important soldierly quality, courage. Gideon did not inspire them with courage, he simply bade them pick up their swords and depart, thus leaving them out of the scene altogether.

The Force Reduced to Three Hundred, Judges 7:4-5. Still the force was too large. Gideon brought the men down to the water and there tested them further. All but three hundred bowed down upon their knees to drink, that is, as the Hebrew is said to mean, strictly, to drink by putting their mouths in the water. Three hundred of them carried the water to their mouths with their hands, and one was telling his dream. He had seen a round barley cake roll against his head, and he saw the sword of Gideon, the son of Joash, a man of Israel, as he came down upon him.

The Strategy, Judges 7:14-18. The dream and its interpretation heartened Gideon from the enemy themselves he had gained assurance of victory. He returned to his camp with the victorious shout, "Arise, for Jehovah hath delivered into your hand the host of Midian." Then he bade them look to him and do as he did. He saw how his trumpet they were to blow theirs and shout, "For Jehovah and for Gideon."

The Effect of the Strategy, Judges 7:19-22. The plan was carried out. The dazed Midianites thought themselves surprised and knew no friend from foe, turned against one another, and the survivors fled afar. Gideon pursued and overtook them at Karkar, far in the desert. There he gave battle, captured the two sons of Midian, and utterly routed the host.

Funeral Causeway

A City Of 20,000 Dead Is Unearthed From The Dust Of Fifty Centuries In Egypt

A city of 20,000 dead and a richly ornamented funeral causeway have been unearthed from the dust of 50 centuries in Egypt.

The discoverer, Selim Bey Hassan, said at least 20,000 mummies lie in the necropolis beneath the causeway which connected a valley temple with the funeral chapel of Unas, last king of the fifth dynasty.

Discovery of the dynasty was termed a find of highest importance because inscriptions on the walls answered the question if ancient Egyptians cut and dressed granite for statues and tombs.

The causeway is a passage 700 yards long and seven feet wide. The side walls, nine feet high, were covered with the largest known collection of old kingdom inscriptions and scenes.

Scenes depicted included the transport by boat of red granite columns and capitals from Aswan to the pyramid of Unas, wrestling between Egyptians and Bedouins, and transport by boat of Asiatic prisoners.

The cemetery was cut from solid rock and covered several acres. It was traversed by long galleries from which passages led to funeral chambers and storerooms. Along with the thousands of mummies were found pottery vessels and fragments of alabaster vases.

Voluntary Militia

Empire's Second Line Responsible For Home Defence

In Britain a voluntary militia chosen from men who, between the ages of 18 and 21, had served periods of compulsory citizen service in spheres other than military is strongly advocated by Sir Edward Grigg, parliamentarian and writer, in his book, "Britain Looks At Germany."

This would be the empire's second line—responsible for home defence. Every young man would perform citizen services of some kind for three months but for the majority it would be physical training and public works on lines of civilian conservation corps of the United States.

London has an all-black building. The facade is made entirely of polished black granite, which reflects color from the sky and glitters in the sun.

Health LEAGUE of CANADA
presents
TOPICS OF VITAL INTEREST
by DR. J. W. S. McCULLOUGH

The Queen's Mother

Countess Of Strathmore Preserved Simplicity In Her Home

The Countess of Strathmore in all she did preserved the simplicity and dignity of a great lady whose life was centred in her faith and in her home.

Her tastes were simple; she took keen interest in gardening, and she loved to round the border of the canopy of one of the great four-poster beds at Glamis Castle she worked with her own hand the names of her nine children, with the dates of their births. She embroidered many exquisite tapestries. One of the most cherished heirlooms at Glamis is the great bed in which "Bonnie Prince Charlie" slept. When its rose satin canopy fell to pieces with age the Countess made an exact replica. She brought up her family without "frills," and there was always a homely atmosphere in the feudal castle at Glamis, set amid a background of hills, lochs, heath and moorland, where our Queen spent her childhood. The Countess taught the little girl to sew and cook like any good Scots maid, and when war turned Glamis into the pleasantest of hospitals for wounded soldiers the young Lady Elizabeth Bowes-Lyon knitted socks with the village girls.

Lookout Towers

Change In Method Of Detecting Forest Fires In National Parks

A radical change in the method of detecting forest fires in the Riding Mountain National Park has been instituted in both reserves, according to F. A. McDonald, assistant Dominion forester, in the west to inspect the new equipment. The system includes a number of lookout towers, strategically placed, to give complete coverage of the parks, which, he declared, is more efficient and cheaper than any method previously used.

Mr. McDonald has just completed a tour of all the Dominion parks and was in conference with G. Tunstall of Winnipeg, who is in charge of Dominion forestry work in Manitoba and Saskatchewan. The towers in Riding Mountain park are being located by J. D. B. MacFarlane, Ottawa, with A. L. Best, forestry ranger, in charge of construction.

Always Something To Learn

Worth-While Persons Never Satisfied With What They Know

S. S. Schneitzler, author and educator, writing in the Rotarian Magazine, says little homes, little bank accounts, little educations, are all very well in themselves provided they don't drug us with a false sense of having reached the end of the road of achievement instead of merely being at the beginning of it, and provided we don't allow those who have ceased trying, to rob us of the "divine unrest" of which the poet speaks. . . . Let us enjoy the things which we have, but let us not be content with them. Let us love every inch of the tiny mental homes which we now inhabit, but, at the same time, let us dream of intellectual dwelling places bounded only by infinity and roofed over by the infinite. No contentment but aspiration is the food of the giants of our coming generations.

Proved A Boomerang

W. C. Taylor bought a treacherer to frighten at his boarding house, Kansas City. In a dark hallway he reached into his pocket for a cigarette. His fingers clutched the "cracker," placed it in his mouth, lit it. "I just forgot the darned thing," Taylor told the doctor who repeated his mouth. He lost several teeth.

A bullet has more penetrating power at 30 feet than at two feet; it "swings" or "bounces" on leaving the gun, and this lessens its effectiveness.

Daily use

WIGLEY'S GUM
 Relieves that stuffy feeling after eating. Cleanses crevices between teeth. Co., assures sweet breath. A simple aid to health! Buy some now! Small tin cost 5¢ in 10¢ tin 15¢. Enjoy it after every meal—millions do!

WHAT HO!

—By—
 RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XVI

Fog, like a gray blanket, pressed down on the sprawling city. It was a "London particular," damp as a Marmalade's kiss, and so thick and palpable it could almost have been molded into fog-balls. Veteran policemen lost their way and fast-backs crept along on hands and knees.

Lady Rosa Bingley groped her way to that strip of pavement along London River where the roofless and hungry rest awhile before they are moved on by the police or some higher forced to move on.

To find any man in that fog was a feat comparable to finding a midwife in the steam-room of a Turkish bath. Lady Rosa collided with a mound of muscle, which growled in a gin-roughened voice.

"Cantler, see where you go!" "No," said Lady Rosa. "There's more light in Leicester Square," said the man.

"Thanks," said Rosa, and pushed on.

The benches along the Embankment did not hold their usual complement of unfortunates that night. Before one bench Rosa stopped. It was occupied by an old man, who looked like a bleary, sodden Santa Claus.

"I'm looking for a young man—" "What an old one!" he asked and showed a maggot-tooth in a hideous grin.

"I'm afraid not," she said. "The young man has a dark blue overcoat and an old gray hat."

"I did see a chap dressed like that an hour ago," the old man said. "Where did he go?"

"Into the fog," she said. "Which way?" "I forget."

She dropped a shilling in his horny palm. He clutched it and with a "Thankie, lady," got up and melted into the fog.

She moved along the line of benches. When she saw the dim outline of a figure on one of them in the muffled lamplight, she would draw closer and call "Ernest! Ernest!"

A Reginald responded, and an Alf and a Kenneth, but not Ernest. It was slow going, slow and chilly, and discouraging but she kept on.

After a fruitless half-mile, worn out, she sat down on a bench. Peering about her she saw that on the next bench somebody had left a package, a very large package, large enough to be the laundry of Gog and Magog. It was shapeless, and wrapped with soggy newspapers.

Lady Rosa reached out an exploratory finger and touched it. From inside the package a tired voice came.

"All right, officer. I'll move on." "Ernest!" cried Rosa. "Ernest!" "Who knows me around here?" asked the half-awake voice of Ernest Bingley.

"Ernest. It's Rosa." He broke out of his cocoon, and saw her face, close to his. "Go away! Go away!" "Oh, Ernest, what have I done?" "Are you really real?" he faltered. "Pinch me."

She held out her arm. He pinched it. She yelped. "It is you," he said. "It is really you."

"Pinch me again if you doubt it." "Oh, Rosa, what are you doing here?" "Looking for you."

"Well," he said, "you've found me."

"Yes, Ernest, I've found you." He sat beside him on the bench. "Your teeth are chattering," she said.

"So are yours." "You'd better go some place where it's warm," he said. "That's as it is. Let's go."

"Not me, Rosa." "Why not?" "We said good-bye once." Ernest said. "Let's not go through it again."

"You can't stay here. You'll catch cold." "I've already caught one," said Ernest, and sneezed. "Please go, Rosa."

"I will not," he said, firmly. "Well, a cop will move you along shortly," said Ernest. "He's about due. He's moved me twice already."

"Ernest Bingley, what are you doing here?" "Waiting for a boat."

"Be serious, I am." "So am I," said Ernest. "My boat does not sail till day after tomorrow."

"You might have chosen a more comfortable spot to wait," Rosa said. "I repeat my question—why are you here?"

"Just an adventure," said Ernest. "I'm seeing London night-life. I've read about this place, and I've always wanted to spend a night here to see what it would be like to be down and out. It's good for the fellow in my position to see how the other half lives now and then."

"What would Miss Rowena Castle think of such behavior?" "Miss who?"

"That's your fiancée," Rosa reminded him. "Oh, you mean Rowena," said Ernest. "Why should I approve of it? She's a student of sociology. We often sit in Battery Park or Bryant Park in New York and study life."

"I thought she lives in Chicago." "She does. But she often flies her plane to New York."

"Does her father own all the hotels in New York, too?" "No. Only four. Two little ones and two big ones."

"Do you believe it is wicked to tell lies, Ernest?" "Of course I do."

"Then why tell 'em?" "Don't you believe her father owns all those hotels?" said Ernest. "I don't even believe that there is such a person as Rowena Castle."

"But you saw her picture," said Ernest, and sneezed. "I saw a picture of Lucy Bingley," said Rosa.

Ernest began to tear up his paper swaddling-clothes with agitated fingers. "I had to do it, Rosa," he said. "Why?"

"It's a long story—" he began. "We have all night." "You'll catch cold."

"I've caught one. Yours. Go on." "You see, it's like this—" Ernest began again.

"The perfect prelude to a whooper," said Rosa. "But do carry on, Ernest."

"I'm a busy man," said Ernest. "Many interests. Mergers and amalgamations and reorganizations and—well, lots of things that take up my time and attention. Being a bachelor, I can devote all my time to my affairs. If I were married, well, it would take up too much of my time."

"It might. Carry on."

"Bo," said Ernest, continuing to reduce the newspaper to scraps. "I invented Rowena Castle. You see mothers of debutantes were always angling to make a match between me and their daughters—"

"I'm not anybody. I'm nothing but a nothing. I'm only—" "The village canvas suffer without a shop to stuff in," she finished.

"Who told you?" gasped Ernest. "Does it matter? Do you think I care how poor you are in money when you're so rich in kindness and courtesy? Besides, you're not poor."

"Oh, yes I am," said Ernest. "I haven't enough for a bed. Just some coppers for food till my boat sails." "And a twenty thousand pound interest in a castle."

"As if Father would take it as a gift. He's a Bingley, too, you know. Let me see now—the interest on twenty thousand at four per cent. is—"

"Rosa!" "Yes, Ernest?" "Do you like dogs?" "Love 'em."

"Adore 'em." "Gold fish?" "My favorite fish." "Guinea pigs?"

"Mad about the little darlings." "Is there a pet shop in Bristol?" "Not a good one."

"There's a going to be." "Yours?" "Ours."

A bulk of a constable loomed in the fog and advanced slowly toward them. "Rosa, darling?" "What, dearest?"

"I love you," said Ernest. "Get ready!" "What for?" "I'm going to grab."

He grabbed. "Ere, ere now, you two, none of that now," said Police Constable XOT77, playing his flashlight on the bench. "This ere ain't no blinkin' Garden of Eden, you know."

"That's what you think," said two voices as one.

The End

Work Was Outstanding

W. J. Slater Taught English To New Canadians In Winnipeg

W. J. Slater, who taught hundreds of New Canadians the English language, has retired as principal of Isaac Newton High School, Winnipeg, after 34 years' service.

When Mr. Slater, who went to Winnipeg from Scott Township, York Co., in 1906, began teaching in a North Winnipeg school, his pupils were almost all immigrant children who knew no English. He evolved a system to meet the challenge, and today regards the friendship of foreign families with whom he freely mingled a fitting reward for his efforts.

His teaching system is now in general use in Manitoba, and he received handsome royalties for his book on the system.

"I could have left the district," Mr. Slater said, "but the people and their problems became my prime interest. Most of our own people at the time did not understand them. I liked them and tried to help them."

Explaining his teaching system, he said: "The children were not given plain language lessons. They were encouraged to talk about things they knew and saw. Details of their everyday life formed the basis of the plan."

Slater trained 200 teachers in the system and conducted a night school for pupils above school age.

Birthplace Of Thomas Hardy

Famous English Author Did Not Wish It To Become A Show Place

Bochampton Farm, birthplace of the late Thomas Hardy, the author, has been sold to P. F. Parsons, an income tax official tenant of the farm for the past 12 years.

THE WILSON FLY PAD CO., Hamilton, Ont.

Charles Dickens' Letters

Famous Novelist Had A Very Poor Opinion Of Government

More than 1,000 letters by Charles Dickens, including an outburst against the Morning Chronicle for which he once worked, were placed on sale in London recently.

The sale brought £3,857 (\$18,435). A series of letters to Thomas Beard, parliamentary editor of the Chronicle when Dickens was a press gallery reporter, were bought by Messrs. D. Southwood Smith on social reform, he wrote:

"I greatly fear that until governments are honest, and parliament pure, and men more so, it is almost a cruelty to limit even the dreadful hours and ways of labor that at this time prevail. Want is no general distress, so great, and poverty so rampant."

To Sir Joseph Paxton he wrote: "The House of Commons seems to me to be getting worse every day. I solemnly declare to you that direfully against my will I have come to the conclusion that representative government is a miserable failure among us."

An Interesting Fact

Languages And Dialects Spoken In Canada Number 110

French and English are the official languages of Canada, but there are 110 languages and dialects spoken in the Dominion, according to Rev. J. S. Harrington, Toronto, district secretary of the British and Foreign Bible Society, who returned to Canada aboard the liner Montclair after attending a London meeting of the society.

"At a glance one might say there were only four languages spoken in our country," Mr. Harrington told reporters, "English, French, Eskimo and Indian, but the Eskimo alone accounts for about six translations, various Indian dialects for another seven or eight, and the polypur of the Dominion's immigrants build the total up to 110."

Sell War Supplies

United States Does Big Trade With China And Japan

United States firms sold Japan and China more than \$20,500,000 worth of war supplies during their first year of conflict. State department figures showed that China bought \$12,559,741 and Japan \$7,964,413.

Japanese purchases, however, have increased at a much more rapid rate, with the result that in the last six months Japan has become a bigger buyer by several hundred thousand dollars.

War supplies sent to both belligerents were principally aeroplanes, motors and accessories. Most shipments to China were licensed for Hong Kong, British port, through which they go into the interior.

One, Two Or Three

A bewildered lady, lost in the caverns of the Waldorf-Astoria, appealed to a nearby lincery to direct her to the main dining room. "Beg pardon, Ma'am," came the gentle but reproving answer, "but we have three main dining rooms."

A musician in a London restaurant plays what is thought to be the only brass violin in the world. The instrument was made from empty French shell-cases.

Bees showed the Indians where to get wax for sealing the seams of canoes. The red men observed the bees sealing their hives with wax from balsam poplar buds.

Heat Exhaustion

Use Of Common Salt Of Benefit To Those Who Work In High Temperatures

The severest muscle cramps occurring among workers exposed to unusually high temperatures, are common among steel workers, miners, foundry men and ship stokers. They are sometimes called "heat cramps," or "miner's cramps." While the existence of these muscular palsies had long been known to occur it was left for J. S. Haldane, the eminent English physiologist, to suggest that this condition was caused by the loss of salt in the process of sweating.

Another Englishman, K. N. Moss, had previously pointed out that sailors voluntarily ate more salty food during extreme hot weather.

Most people are aware of the symptoms of heat exhaustion. These are general depression, headache, dizziness, nausea, diarrhoea and stomach distress. In the severest form muscle cramps occur as well.

As a result of Haldane's suggestion, a group of mine workers was induced to try the salty water. The results were magical. There were no further attacks of cramps and much less complaint of fatigue than formerly.

A similar experiment made in Russia showed that when salt was administered to persons working in high temperature they were less subject to fatigue and heat exhaustion.

The objection to this form of treatment is the salty taste. This has been overcome by the use of five-grain salt tablets to which, as a further improvement, five-grains of dextrose are added.

In the Journal of Industrial Hygiene for December 1931, are given some interesting data on the benefits of salt taken in tablet form by workers in a large salt plant.

Over 3,500 men at work in the plant. In the summer of 1927, heat cramps were responsible for the loss of 48 working days among this group. The use of salt was begun the following year with the result that only nine days were lost.

In 1929, the loss was but four days and in 1930 none.

The means of prevention of the ill effects of heat exhaustion are simple. Ordinarily the use of five grains of salt with each drink of water is ample. Try it!

Strawberry Not Correct

Popular Fruit Was Called Strawberry By Anglo-Saxons

Strictly "strawberry" is a misnomer, says the Calgary Herald. It is neither a berry from the botanist's angle, nor does it gain its name from the old custom of mulching between the rows with straw, ostensibly to keep the ripe berries out of contaminating dust.

For the strawberry was esteemed long before the wild berries of meadow-lands and sunny hill-sides were cultivated as a garden crop with straw strewn between the rows. To the Anglo-Saxons they were the "straw-berries," from their habit of propagation by runners straying from the parent plant. Correctly, the ancient name of the fruit which conquering Roman legions and Norman knights found ripe and luscious in England gardens, persisted among the Cockney fruit-peddlers of London calling "Straw-berrie ripe; who'll buy ripe straw-berries?"

Poison Venoms

Declared To Offer New Hope For Sufferers From Certain Allergies

The poisonous venoms of bees, lizards, salamanders, and the deadly rattlesnake and cobra were declared to offer new hope to sufferers from polio, paralysis, spinal cord injuries.

Use of insect and reptile poison to treat pain from cancer and other malignant diseases is not new, Dr. M. D. Green of New York, declared in a report to the American Association for the Advancement of Science, but method of using them to "block off" individual nerves or sets of nerves is now being successfully applied for the first time on a large scale.

The poisons are much more effective in relieving pain than opium or morphine, but heretofore they have been used primarily in making cures the last days of persons suffering from incurable diseases.

A Native Superstition

Native superstition keeps Djuka tribesmen of Dutch Guiana, South America, from spitting out any food which has been in their mouths. An evil spirit is thought to search for the food thus expectorated and place the Djuka's life in jeopardy when found.

The aircraft of the Imperial Airways, and its associated companies cover nearly 28,000 miles a day.

For Your Preserving

Use It This Year

Old English Cottages

Permanent Record To Be Kept In The Form Of Models

When all the old cottages of the English countryside have made way for new ones there will at least be a permanent record of them—in the form of models—at the Geoffrey Museum, London, E.

London County Council has bought the models from J. A. Davidson, of Golders Green, son of an architect, who likes making models of such vanishing picturesque things as cottages and windmills.

They are made of cardboard and although only about five inches high, show every essential detail, tracing the development of cottages in various parts of England from 1300 until to-day.

Wedding Of Midgets

Thousands Blocked Streets During Ceremony In Tiny Town Colony

Several women were trampled on and several others fainted when 10,000 people blocked the street around Sacred Heart church in Blackpool, England, where two members of the midget colony known as "Tiny Town" were married.

Anne Knepe, the 42-inch bride, is the principal dancer of the midget troupe. The groom, Herman Retter, is two inches taller. Henry Glover, mayor of Tiny Town, gave the bride in marriage.

Oil production in Trinidad last year established a record for the colony with a total of 15,692,785 barrels. Petroleum and its various products represented nearly two-thirds of the total value of Trinidad's exports.

AN OUTDOOR MAN WRITES AN

Outdoor Story!

The far north... bitter cold... gold... and romance! These are the elements that make up a truly unusual story of life in the Canadian Rockies, now told with captivating skill by a master of his craft.

You'll be caught in the mad whirlpool of excitement that courses wildly throughout this entire story... you'll wait expectantly for each succeeding issue to read a new installment. The refreshing atmosphere of Canadian wilderness has been captured for this serial; the bitter reality of life, love and hate has been placed on the printed page.

Have You Ever Noticed That—
The race nearly always goes to the swift,

The solace to him who frets.
It's the babe who yells that gets the milk,
And it's he who grabs that gets.

That rumor circulated last week to the effect that the walls of a bank building in Vancouver expanded and tumbled when Mr. Aberhart made a deposit in it proved to be untrue. All bank buildings in Vancouver are reported intact and not suffering from unreasonable or insane taxation.

Three hundred and ninety-five residents of the little town of Strathmore forwarded a petition to Premier Aberhart, via Manning, protesting against the closing of the local bank. Copies were also forwarded to Rt. Hon. W. L. Mackenzie King, prime minister of Canada, and the constituency member; also to the supervisor of the Royal Bank of Canada.

A good editor is one who has never made a mistake, who never has offended anyone, who is always right, who can ride two horses at the same time when straddling the fence with both ears on the ground, who always says the right thing at the right time, who always picks the right horse, who always picks the right politician to win who never has to apologize, who has no enemies, and who has words of prestige with all classes, creeds and races. That is all an editor has to do to be rated a good editor—and there has never been a good one.

Mosquitoes are holding a real revival this summer, and it may not be surprising to learn that it is the female mosquito that does all the biting. The male merely adventures and explores, zooming around looking for new pastures for his girl friends to invade. The girls are really putting their teeth into their work this season. Many an old timer who thought he had become immune thirty or forty years ago, is scratching and expostulating and declaring that a new amazonian race of mosquitoes has risen to take its toll of man. While this current raid on comfort is very unpleasant, it is also reassuring to find that the good red blood of Alberta is still in demand. There may be some who do not approve of us, but at least we stand ace high with the mosquitoes.—Ex.

Teacher: "Willie, tell the class what the Hague Tribunal is."

Willie: "The Hague Tribunal is."

Teacher: "Don't say 'The Hague Tribunal is.' Willie. Use 'is'."

Willie: "The Hague Tribunal is—trates national controversies."

Clergyman (to small boy): "Well, my boy, what is your name?"

Boy: "Bill, sir."

"And how did you get that name?"

"My father says I came on the first of the month with the rest of the bills, sir."

Rastus: "Ah's sure advanced in do pas' couple ob years."

Mose: "How's dat?"

Rastus: "Well, two yea's ago Ah was called a lazy loaf, 'n now Ah's called an unfortunate victim of de unemployment sitchesayshun."

TRY OUR SOCIETY PRINTING

The new dance hall at Waterton is expected to open this week end.

"All is quiet on the western front." Premier Aberhart is holidaying there.

Mr. and Mrs. John Stokluk were down from Calgary during the week.

For carrying a passenger in a public service vehicle—a truck—a man at Nanton was fined \$10 and costs.

As the bald-headed man said as he raised his hat: "I have nothing to conceal."

Mr. Baker, representing Deliveries Limited, Calgary, was a visitor to The Pass towns this week.

John Colclough, of Pincher Creek is relieving Manager Innes at the Royal Bank, Bellevue.

W. W. Dahl, of the Pincher Creek Royal Bank staff, is relieving at the local bank this week.

Arthur Ennis and family returned the early part of the week from a trip to Creston.

James Kirkpatrick, who was first J.P.R. agent at Macleod, died in England on July 1st.

The Peigan Indians completed their annual sun dance programme last week end. This week the Blood Indians are in session.

Mrs. John Manchuk was down from Nanton to attend the funeral of Mrs. Zimka, returning home Thursday afternoon.

Victor Law returned to Crossfield yesterday, after spending about three weeks here with his mother, Mrs. Bartlett.

A heading in one of our Alberta exchanges read: "What's Doing in Edmonton." Under it was a whole blank column.

Joe Kelly caught a speckled trout in the Pincher creek last week that measured 17½ inches and weighed three pounds.

Didn't hear of any big reception being accorded our Abie at Vancouver. B.C. folk evidently knew their onions!

A heading in the Calgary Herald reads: "Masked Pipers Rid City of Mice." Why not mask the saxophonists and rid the city of every living creature?

Arthur Ellis, famous Canadian hangman, died in a Montreal hospital on Thursday afternoon, at the age of 73. He had over two hundred hangings to his credit, most of whom would be glad to meet him again.

Miss Winnifred, daughter of Rev. and Mrs. A. E. Lark, of Macleod, recently received word that she had passed with first-class honors in her Grade III, examination under the Toronto Conservatory of Music.

Mrs. W. R. Lees, former resident of the Mountain Mill district, passed away on Saturday last at the home of her son, Gerald, in Seattle. Her husband predeceased her several years ago.

Complaints have been received that every time Mr. Taysam and Mr. Jackson go fishing on Cameron Lake, the lake overflows, and the park authorities may have to put in an overflow.—Pincher Creek Echo.

The L. M. Peel ranch, consisting of 1275 acres, north of Lundbreck, has been sold to Robert Patterson, of Lethbridge. Mr. Peel has been residing at the Pacific coast for the past four years, and will make his home there permanently.

Guest: "Waitress, what's wrong with these eggs?"

Waitress: "I don't know. I only laid the table."

Lady: "Is that a real bloodhound?" Policeman: "A real bloodhound? I'll say! Here, Rover, bleed for the lady!"

A city and a chorus girl
Are much alike it's true.

A city's built with outsiders,
A chorus girl is, too.

NEWS FROM EDMONTON

(By T. B. Windross)

Edmonton, July 18.—Government plans for the impending new issue of scrip, the withering reception which cabinet ministers met in public meetings in the province, and the rejection by the Privy Council in London of the Alberta bank taxation bill, all vied for chief attention in political Alberta last week.

The bank taxation bill, which like the bank licensing bill and the press bill, was passed by the house last fall, but failed to get royal assent and then was declared illegal by the supreme court of Canada, and lasted just one week longer in its privy council appeal than had the other two. It sought to impose a fresh tax of \$2,000,000 a year on the bank branches operating in Alberta, an average of close to \$12,000 for each branch. And virtually all of them have been losing money during the past ten years, and already pay provincial taxes totalling about \$310,000 to the Alberta government.

The empire's highest court did not issue publicly, immediately, its reasons for declaring the bank taxation bill invalid. But Lord Atkin said that the reasons were being communicated to the provincial government. So far there has been no sign that the government has received a statement of the reasons.

The reaction of the cabinet and of the Social Credit board was a surprise to political observers in Edmonton, however. Premier Aberhart said that the court's decision made "no difference whatever to the government's plans or programme for the future." This despite the earlier claim by the government that the taxation bill along with the bank licensing bill and the press bill, were integral parts of the "social credit" plan.

So another phase of the Aberhart government's sham-battle with words and facts was gassed with heavy expenses for legal fees, and Alberta moved toward the next phase: the new experiment with scrip.

The government is "not going" to call it "scrip" this time, because it didn't leave a very satisfactory feeling in the province the last time, two years ago. This time it is going to be called "tax remission slips," and according to Social Creditors who have had something to say about it so far, it is going to be handed out to men who work on roads. But, according to the same M.L.A.'s, it is going only to men who work for municipal districts to pay off their municipal taxes. Therefore, the province will be handing over its new scrip in payment for municipal work.

Establishment in various constituencies of branches of the provincial treasury department is being envisioned. Those branches may be called "credit houses," in view of the fact that the original idea of an Aberhart credit house seems to have been shelved. It is believed in informed quarters that the government is going to attempt to combine those branches with the "credit unions," which were authorized under the act passed at the last session, although there is no provision in the credit unions act to permit the unions to handle anything other than real money—money that, according to the act, may be deposited in a chartered bank or other institution approved by the supervisor. And scrip cannot be accepted by a bank.

Even in the plans for credit unions, however, the government and the "social credit" board have disregarded expert advice and the knowledge of experience by laying down all the rules and supplying executives for such unions.

Roy F. Bergensen, outstanding organizer and supporter of credit unions, and the most authoritative writer on their operation, declares in his latest book: "It is a basic principle that the credit union cannot be superimposed. Organized within a group of employees, it must be operable by the employees for the employees." But under Alberta's plan it will be operated by the government, and if the credit unions are tied up with the new scrip idea, they will be operated for the benefit of the government.

Provincial Treasurer, Solon E. Low, and Social Credit board member A. J. Hooke were howled down and laughed at when they tried to deliver their reasons of the Social Credit record last Friday night at Red Deer. There was a Social Credit meeting, called by the Social Credit constituency executive, and there were 1200 persons present. Mr. Low said, as he left the platform, that it was no use casting his pearls before "swine," he hastened to apologize when one farmer went up and asked him what he had meant. The next day Mr. Low, safely back in Edmonton, said that there were only about twenty people in the meeting who interrupted him, or were opposed to him. An organizer for the "Unity League" had organized the heckling, he said, and the interrupters were "rowdies who had been plied with liquor" before the meeting. Asked whether he really believed that only twenty people could prevent him from speaking if 1200 wanted to hear him, Mr. Low replied, "certainly." In answer to Mr. Low, the Unity Council member for Red Deer, J. A. Arnot, showed that Unity League members had deliberately remained away from the meeting and that they had no part in it.

The opposition to Low and Hooke, it was shown, was general in all parts of the hall, and included business men and farmers, but there was no organized demonstration whatever.

One of the chief complaints of the crowd was the absence of Premier Aberhart, who had been advertised as the speaker. He did not show up, and Mr. Low admitted that he had passed through Red Deer earlier in the day. It also was admitted that although the premier gave a sore throat as the cause of his absence, he was scheduled to speak Sunday at Calgary—but over the air where he could not be asked questions. Just a week before, he and Hon. N. E. Tanner had been howled down and hooted from the platform at Okotoks.

Jack Johnson, of Vancouver, blew back to The Pass last week end, on a visit to his son William here and relatives and friends in Coleman. Jack is looking as robust as ever, and claims he's not looking for a dividend.

First Student: "Why is it women pay more attention to beauty than to brains?"

Second Student: "Because no matter how stupid a man is, he is seldom blind."—Gateway.

Louis Napoleon Leamy died at Creston last week. Deceased had sub-contracted and bossed construction gangs during the building of the Crows' Nest branch of the C.P.R. and later was prominent in logging operations in the Cranbrook district. He was in his 80th year.

William Lees, aged 22, a native of Fernie, died shortly after being struck by a crane at Tadana, Trail. He is survived by his wife and baby son, less than a year old; also his parents, Mr. and Mrs. Andrew Lees, of Fernie, and two brothers, Andrew, of Gary, Indiana, and George, of Fernie. The jury returned a verdict of accidental death.

Drs. Rose and Claxton entered upon their duties at Coleman last week, succeeding Drs. Borden and MacLean. Dr. Rose has purchased the A. M. Morrison residence, and will move his family from Winnipeg. Dr. Claxton has moved into the house formerly occupied by Mr. and Mrs. Arthur E. Graham, who in turn have moved into the residence vacated by Dr. and Mrs. MacLean.

Edmonton City School are defying the Aberhart government. The school board is refusing to pay more than half the interest rate on its indebtedness to the government till the government pays in full the interest on government of Alberta bonds held by the school board. At the moment the government has threatened to withhold the Edmonton school grant. If Aberhart's interest doctrine is genuine, surely he is wise enough to see that it should work both ways.—Clashesholm Local Press.

Mr. Noser: "So you've been to Italy, have you? And how did you enjoy Bologna?"

Mrs. Tiltmore: "Oh, just fine—but little Romeo would swallow the skins!"

Jim: "But for Edison we wouldn't have had the motion picture, talking machine, or the telephone."

Joe: "Yes; but I still think he was a great man."

"I note that many newlyweds are using trailers."

"Yes, a rolling home gathers no mas."

Stout Lady: "I bought this dress for a ridiculous figure."

Clerk: "For a ridiculous price, you mean."

"Daddy, was Robinson Crusoe an acrobat?"

"I never heard that he was. Why?"

"Well, it says here that at the end of the day's work he sat down on his chest."

A Definite Program Needed

With the return to more nearly normal climatic conditions resulting in Western Canada at least, in larger returns from agricultural operations the time seems to have arrived when greater consideration will have to be given to a national policy which will ensure a better balance in the future between the industrial and agricultural life of the country, than has hitherto existed.

It can be admitted forthwith that there is nothing new in the doctrine of a better balanced economic structure. The need has been recognized and voiced on previous occasions by statesmen, economists and politicians, not only in the recent depression days, but similar statements were made as far back as ten, fifteen and twenty years.

In the past, however, such injunctions have usually been regarded more or less in the nature of an academic or textbook theory, as an ideal perhaps to be kept in mind but without particular pressure being brought to bear as to the necessity for shaping all governmental, private and corporate activities towards this specific end.

Towards An Objective

Now, however, that the country is presumably on the threshold of an era of rehabilitation and recovery, it would appear highly desirable that the main objective for the future development of the country and, ergo, the prosperity and happiness of her people be not lost sight of; that whatever policies are devised to assist the people and the industries of the country to re-establish themselves on a self-dependent basis, they should all lead in the one direction—a more nearly balanced economic life.

Until this is done there can be, not only no guarantee, but not even a prospect, that there will be no return of similar conditions to those from which the Dominion is now apparently emerging; at some time in the future possibly not far distant, perhaps more remote.

In comparison with other industries it must be borne in mind that agriculture affords comparatively little employment and while the farmer is producing, under normal conditions, huge quantities of foodstuffs, the industry itself makes almost no provision for workers to consume its products.

It is therefore essential that other industries giving employment to a relatively large number of workers exist side by side with agriculture in order to ensure consumption locally of a larger percentage of the commodities produced by agriculture, if the latter industry is to prosper. The only alternative for an industry dependent upon remote markets of world-commerce character for the sale of the bulk of its products is to curtail production.

Now, while curtailment of production may, to some, appear expedient it is a wasteful policy, difficult of attainment where output is largely dependent upon the vagaries of seasonal climatic conditions and above all, history has yet to record success in this field of experimentation. In other words, it is not the road to prosperity.

This being the case, the objective of those who have the welfare of the country at heart should be measures which will ensure greater consumption of the output of agriculture as close as possible to the site of production.

A Combined Aid

So far as Western Canada is concerned there are many ways in which this may be achieved, no one of them in itself a complete solution of the problem, but a combination of them, with each pressed to its ultimate possibility, should go far towards placing agriculture on a more permanent and prosperous basis.

The solution of the problem for western agriculture appears to lie in the direction of greater consumption at home of the products of the farm and the farm. It predicated among other things greater diversification of agriculture to ensure local markets for a greater percentage of the products of the farm. It suggests local processing of more of the products of the field, thus providing for the establishment of more industries affording employment for more consumers and ensuring their ability to purchase these commodities—a natural concomitant of greater diversification.

It also indicates the necessity of more vigorous prosecution in the search for and development of the natural resources with which the west is richly endowed, again providing more sources of employment and hence of greater consumptive ability.

As a further means to this end there is ample scope for research work into the possibilities of making greater use of agricultural products as raw materials in manufacturing processes, which in turn, would open wider opportunities for diversification in agriculture and create more industries, hence, increase consumptive demands.

There are also possibilities in the further development of by-products from grains and other agricultural commodities now grown more or less extensively on Western Canadian farms, and with further research and experimentation some of these by-products could be made a commercial feasibility. There are in the western cities chemical and laboratory experts who have done some work along these lines who are in entire accord with this statement.

A More Enduring Basis

These are only some of the possibilities which, if they were co-ordinated under some general national program, would go far towards re-establishment of the agricultural industry on a more certain basis than it has been in the past and which would go a long way towards softening the blow of future depressed conditions.

Such policies pressed to an ultimate and logical conclusion with wholehearted co-operation between all who are concerned with the future of the country would do much to promote prosperity and contentment and many of the "isms" with which the people have recently been afflicted would vanish into thin air.

International Exhibitions

An international agreement controls international exhibitions, and stipulates that they can only occur once every six years. The next international exhibition cannot take place until 1941 under this agreement.

A "glass train," exhibited in London has two passenger coaches with walls, ceilings, floors, and fittings made of glass, and 100,000 tiny mirrors covering the exterior.

I always wanted to be a blacksmith—it is a man's job, said Stanley Baldwin.

England Is Air Target

Sir Samuel Hoare warned London would be a prime target for enemy airmen in the event of war and urged adoption of all necessary anti-aircraft defence measures. The home secretary told the London air raid precautions committee the danger of fires during an air raid was great.

Weighing 42 pounds, the world's largest sapphire is valued at \$20,000. It is a white sapphire; had it been blue, its value would have been incalculable.

The wings of queen ants are broken off after their nuptial flight.

Speed Of Fish

Can Reach A Speed Under Water Comparable With Land Animals

One reason why fish can reach a high speed for a comparatively small expenditure of energy is due to a little-known perfection of their make-up which was not fully understood until a few years ago. It was found that quite small fish, when held with their heads immersed in water, squirted through their gills a jet of water which rose several feet in the air.

A realization of what these jets meant came about in the following manner. A device, which claimed to reduce greatly the obstacles to the passage of a ship through the water, was invented by an American engineer. The invention was called an "induced stream-line system," and its main feature was the injection of streams of water through nozzles in such a way as to overcome friction and water resistance.

The significance of the jets of water emitted by fish was then appreciated. They have had an induced stream-line system "since the dawn of history. It was found that of over 300 species of swift-travelling fish were examined, over 90 per cent. possessed gill clefts at the correct places for the most efficient use of jets of exhaled water.

When, in addition to this adjunct to speed, it is remembered that the body of a swift-travelling fish is perfectly stream-lined, its skin is so smooth that it offers practically no resistance to the water, and that the beautifully moulded bullet-shaped head, with the pointed snout, is a perfected cut-water, it is not surprising that a fish can reach a speed beneath the water which compares not unfavorably with speeds reached by animals on land.

It is worth noting here that it is almost impossible to measure the fastest speeds of which certain fish are capable. A Mako shark, for example, has been filmed during a leap in which it put nearly 30 feet between itself and the water. What colossal speed must it have attained to hurl its 600-pound body that distance out of the water!

A swordfish once struck a wooden ship with prodigious force. Its sword pierced through the copper sheathing, an inch of the undersheathing and then a three-inch plank of hard wood. That was a good start, but the fish had only just started its journey of exploration.

Its sword next pierced through the 12 inches of white oak timber and a hard oak ceiling 2½ inches thick. Finally, the sword entered an oil cask and broke off, thus forming a very convenient bung.

Altogether the fish had penetrated 20 inches of timber. Judging by the material of which the sword was composed it was obvious that by no ordinary means could it have been forced through copper sheathing and nearly two feet of wood. The fact of clean penetration showed that the fish, at the moment of impact, must have been travelling at not less than 90 m.p.h.—From Discovery.

A Quaker Wedding

Quaint Ceremony Took Place In Long Island Meeting House

Down the aisle following the men and women in the Methodist Meeting House in Glen Cove, L. I., marched a stately-gowned Florence Elizabeth Willis and Isaac Hicks Cocks. They sat down on a plain wooden bench facing 200 guests. For several minutes there was no sound in the ancient frame building, length, when the spirit moved that, Florence Willis and Isaac Cocks rose and faced each other. The man took the girl's hand, declared he would take her for his wife. They repeated the pledge. Then they sat down. Thereupon everyone present signed a wedding certificate. Thus last week, in traditional Quaker style, Isaac Cocks and Florence Willis became man and wife. Too plain a ritual for modern brides, it was only the second wedding ceremony the little Quaker meeting house, which was founded in 1725 and to-day counts few youngsters in its congregation, had seen in 102 years.—Time.

The Greatest Men

Are Quite Often Those The World Knows Nothing Of

We, like a clergyman in London say, 44 years ago, that he had never heard of Herbert Spencer until he mentioned him, states The Argonaut, yet Mr. Spencer was living at the time less than five miles away and his works were in every London bookshop. Perhaps Sir Henry Taylor and Horace Greeley were not far wrong in thinking that "the world knows nothing of its greatest men."

England has more than 35,000 dramatic societies—one for every thousand persons. 2264

Test Smoke Screens

Defence System For London To Guard Against Air Attacks

When and if bombs start dropping in the next war, London will face a tougher problem than when the Germans peppered the city from Zeppelins 20 years ago.

Officials say the defence system will have to strike a knock-out blow in the first week of war to show enemy bombers lightning attacks are too costly.

Attacking planes probably will roar only 200 feet above rooftops—safely beneath the curtain of fire of anti-aircraft artillery.

To counteract high attack and make it difficult for the government is testing smoke screens to strengthen the balloon barrage it plans to throw around the city.

The screens would be fired up from generators placed at close intervals. A new camouflage department of the air raid precautions administration also is co-operating with the Royal Air Force in camouflage tests on larger buildings.

In "A.R.P." the government has a new camouflage scheme to protect civilians in bombing raids, aid injured, flight gas attacks, and move non-essential members of the population to safe areas.

But wide publicity hasn't popularized "A.R.P." the way the government intended. Lack of co-ordination has been blamed mainly for failure to get recruits for anti-gas and first aid units.

Home office drafted a broad program and left municipal authorities to work out details. Many volunteers had to wait weeks to begin training due to shortage of skilled instructors. The government now is trying to whip up fresh enthusiasm for its big defence scheme.

SELECTED RECIPES

RASPBERRY SHORTCAKE

3 cups sifted Swans Down Cake Flour
3 teaspoons Calumet Baking Powder

1 teaspoon salt
½ cup butter or other shortening.
¾ cup milk

1½ quarts crushed, sweetened raspberries
Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk all at once and stir carefully until all flour is dampened. Then stir vigorously until mixture forms a soft dough and follows spoon around bowl. Turn out immediately on slightly floured board and knead 30 seconds. Roll ¼ inch thick.

Cut in half. Fit one half into well-greased 8 x 8 x 2-inch pan. Brush with melted butter. Fit second half of dough into pan. Brush with melted butter. Bake in oven (425 degrees F.) 15 to 20 minutes, or until done.

To serve, separate halves, spread both with soft butter and part of raspberries. Adjust top and spread with butter and remaining raspberries. Garnish with whipped cream and whole berries. Serves 8 to 10. Strawberries may also be used.

TEA MUFFINS

1½ cups sifted Swans Down Cake Flour
1½ teaspoons Calumet Baking Powder

1 teaspoon salt
4 tablespoons butter or other shortening
4 tablespoons sugar
1 egg, well beaten

Sift flour once, measure, add baking powder and salt, and sift again. Cream butter and sugar, and cream thoroughly; then add egg and beat well. Add flour, alternately with cream, until mixture is smooth. Beat only until smooth after each addition. Bake in greased small cake pans in oven (425 degrees F.) 20 minutes. Makes 12.

Golden Fleece

Australia To Erect Bronze Statue To Merino Ram

Australia is to honor the sources of its golden fleece by erecting a bronze statue of a Merino ram on the summit of Mount Panorama, near Bathurst, New South Wales.

The statue will be about 1½ times life size and will be designed by an official of the Sydney Technical College. Cost of the bronze will be shared by the Graziers' Association and the Sheep Breeders' Association.

Wool is Australia's most valuable primary product—exports for the financial year 1936-37 totalling \$62,504,567 (about \$250,000,000).

Not Eligible

A league for the protection of hen-pecked husbands was formed in a small northern town, and at the first meeting a man named George was elected president.

George had just taken the chair and banged the table for order when a tall, gaunt, stern-looking woman burst into the hall, rushed at George and seized him by the collar.

"You come home!" she shouted, shaking him. "What business have you in a place like this? You are not hesped!"

Discovery Of New Star

Believed By Scientists To Be Hotter Than The Sun

Discovery of what may prove to be the hottest, densest, and at its maximum the brightest object ever known to mankind was pictured to natural scientists in convention at San Diego.

It is a star weighing about 6,000,000 tons to the cubic inch. Only 60 miles in diameter but 400,000,000 times as bright as the sun at its zenith.

Prof. Fritz Zwicky suggested it may prove to be one of the most far-reaching proofs of Einstein's theory of general relativity. He described it to the annual convention of the Pacific division of the American Association for the Advancement of Science.

The super nova (a "suicide star") was discovered last August at the new Palomar Observatory, which is to house the world's largest telescope in two years.

At its maximum it was the brightest object ever observed, 400,000,000 times as bright as the sun. Now it is a million times as bright as the sun, but has shrunk from the size of the sun to a collapsed neutron star only 60 miles in diameter. Its surface temperature, Professor Zwicky believes, may be at least several hundred thousand degrees.

Another Theory

Doctors Now Conclude Worry Will Retard Development In Teeth

After careful study, Drs. A. L. Winsor and Barney Korchin, of Cornell University, have arrived at the conclusion that worry is one of the important causes of bad teeth.

It's all quite simple too once you accept the premises and get the explanation.

Acid saliva is hard on enamel (that's orthodoxy). Saliva is naturally acid (that's more or less heresy).

When one worries or is angry, the mouth produces more saliva. This signifies that the saliva flow has been cut down. And with the lessening of the flow, the acid content increases. And with the increase of the acid content the little impies which are responsible for caries (decay) to you get busy.

And soon the black spots on your molars are as numerous as the black spots before your eyes after a night with a sick friend.

Obviously the cure is to keep your temper and cultivate a placid and contented state of mind.

This recipe sounds simple but is about as easy to follow as the Golden Rule.

Merely being addressed periodically as "my friends" doesn't help much either.

Street Parking Forbidden

Cars Not Allowed On Quebec City Streets Overnight

Going the rounds, Quebec police are carrying bundles of small rectangular cards notifying motorists that overnight parking on the city's narrow streets has been prohibited.

The pasteboards which the constables place on every parked automobile read:

"Welcome to Quebec. Owing to heavy traffic in our narrow streets, for your own protection against damage to your car and to facilitate circulation to the fire department, overnight parking is forbidden.

"Hoping that you will enjoy your visit in our city, we remain, Police Headquarters."

In France all Customs notices appearing normally in other languages than French will in future be also in Esperanto.

At a recent international dog show held in England there were 92 breeds displayed.

I sweeten my morning cereal with **BEEHIVE Syrup** because it is better for me.

TRY IT TOMORROW

Flies Are A Menace To Every Community

Take Precautions To Protect Children From Summer Epidemics

Here is something for every mother to ponder over. According to a leading recognized medical authority, diphtheria and enteritis (which are synonymous with summer diarrhoea) was the first cause of deaths amongst children, from the second to the twelfth month of life, in Canada during the period 1925 to 1929.

It is acknowledged in medical and scientific circles that common household flies harbor germs in, and on, their bodies and may, therefore, introduce infections into foods on which they crawl.

How important it is, then, to protect milk and other liquids, feeding bottles and other receptacles from these filthy pests that threaten the lives of children with typhoid, diarrhoea, and other dangerous diseases.

The dirtier the surroundings, the more flies will swarm and multiply in their thousands. Out-of-doors breeding spots such as uncovered garbage should be tightly covered; all refuse, manure, rotting matter, etc., should be cleaned up; all food and drink should be protected with coverings, and windows and doors carefully screened. If, however, with these precautions taken, flies should find their way into your home, a few Winsor's Fly Pads, placed around the house in convenient places, will soon kill them all. And, if the pads are kept in place during fly-time, they'll go a long way towards protecting your children from summer epidemics and your family and yourself from the dangers and irritation that are caused by flies.

Could Challenge World

English Authority On Music Finds Musical Talent In Canada

Musically Canada can challenge the world. This from no less an authority than Dr. Harold Drake, organist, St. Michael's, Cornhill, England, who has just completed a tour through America, and has been examining for the Associated Board of Royal School of Music. "I have come into contact with a great many music people on this tour," said Dr. Drake, "and I find very few talent in Canada, indeed as fine as in any part of the world." Dr. Drake has returned to England.

At Bakersfield in California is an oil well 15,004 feet, or nearly three miles deep. Oil is now flowing from the well, which is the deepest in the world, at the rate of 2,900 barrels, 117,600 gallons, a day.

AMAZING FLIGHT ROUND THE WORLD BREAKS RECORD

Floyd Bennett Airport, N.Y. — Howard Hughes, quiet, multi-millionaire sportsman, and his four adventurous companions cut the round-the-world record in half, flying 14,824-mile circuit in three days, 15 hours and 14 minutes.

Near the breaking point as the ship landed, Hughes disclosed for the first time two facts he did not hint in his radio broadcasts during the flight—that faulty maps nearly scored a tragic finale to the aerial Odyssey in Siberia, and that on the Trans-Atlantic stretch his gas supply had been "barely enough" to reach Paris.

If the flight had continued at night out of Yakutsk, Siberia, as originally planned, he said, the plane might well have crashed into jagged mountains, the height of which was incorrectly recorded on their maps.

"It's a good thing I didn't try to fly out of Yakutsk at night," the lanky Texan said fervently.

"The maps we had show there are no mountains higher than 5,000 feet there. We measured the mountains as we passed over them the next morning. They were 9,700 feet high and covered with snow."

Stubble-bearded and groggy with exhaustion, the five daring airmen climbed stiffly down from their great built-up ship to face cheering thousands who surged against police cordons to acclaim their feat. Dirty and disheveled, their faces were lined with fatigue.

But they had clipped almost four days from the time made by the late Wiley Post in his solo dash from the same field in 1931, flew over virtually the same route in seven days, 18 hours and 49 minutes. He averaged 83 miles an hour on elapsed time, while Hughes and his companions stepped it up to approximately 161.

Among Hughes' first words as he left the plane, wearing the same battle-battered brown hat, baggy gray slacks and soiled white shirt in which he left New York at 4:20 p.m. M.S.T. Sunday, were:

"Never again!"

He had been asked whether he would attempt such a flight again.

Hughes' big, muscular, middle-aged plane was greeted by a tumultuous roar as it twice circled the field at 11:34 a.m. M.S.T.

Although he had flown 72 miles less than Wiley Post, he had set a mark amazing in its speed, and one acclaimed by airmen throughout the world.

Despite elaborate police precautions the milling throngs surged through and prevented Hughes from getting within 100 feet of the Wiley Post memorial, on which he had been expected to lay a wreath. Police officials had to place the wreath there later.

Building Airplanes

Work To Be Started In Canada As Early As Possible

London, Aug. 24.—A preliminary official said that as little time as possible will be lost before the actual work starts on building airplanes in Canada for the Royal Air Force.

It is understood sites for the factories have not yet been chosen. The official said unless some unforeseen hitch develops necessary preliminaries will be disposed of quickly.

The same source was wary about mentioning any figure in connection with the amount the government would spend for planes manufactured in Canada, but said £20,000,000 (\$100,000,000) would be "on the high side."

The first step to be taken will be the despatch to Canada of the air mission announced in the House of Commons.

Departure Delayed

Lord Tweedsmuir To Remain In Britain Until Mid-September

Ottawa.—Lord Tweedsmuir, governor-general, will delay his departure from Great Britain to Canada until mid-September, Prime Minister W. L. Mackenzie King announced.

His Excellency's tour of western Canada, planned for this fall, will be postponed until next spring, Mr. King said. Lord Tweedsmuir sailed from Quebec July 1 and was expected to return here in August.

To Edit Vancouver Paper

Winnipeg.—W. L. McTavish, former managing editor of The Winnipeg Tribune, was honored by 300 citizens at a complimentary dinner here. He has gone to Vancouver to become editor-in-chief of The Daily Province.

Britain's Food Supply

Agricultural Production Greater In Value Than Any Of The Dominions

London.—After a spirited House of Commons debate on Prime Minister Chamberlain's agricultural policy, the government emerged victorious by a vote of 240 to 137.

A motion by Liberals to reduce the ministry of agriculture's appropriation, in effect a motion to censure the government's policy, was rejected. Some Conservatives abstained from voting.

The food supply debate resulted from Mr. Chamberlain's speech at Kettering, July 2, when he declared any attempt by British agriculture to achieve war-time self-sufficiency in foodstuffs would be detrimental to the nation's trade with empire and foreign countries and would also be impractical.

Defending the government, W. S. Morrison, minister of agriculture, declared Great Britain had made progress in reducing the volume of imported foodstuffs.

Despite its small territory, Britain's agricultural production is greater in value than that of any of the dominions, Mr. Morrison said. Remarkably there were now 50,000 tractor units in the United Kingdom, the minister of agriculture observed that though the rural population had diminished, there had been no reduction in production.

If weather continued favorable, Mr. Morrison said, the next wheat harvest would be the best since 1922. The rebirth of agriculture after the 1918 crisis, the minister declared, was due to "measures to protect the farmers against dumping, to which the farmer is entitled."

Selling Ancestral Castle

Earl Of Egmont Will Buy Or Build Another Home

Southampton.—The Earl of Egmont, Alberta rancher, sailed unexpectedly for New York after announcing he would sell his ancestral home in Hampshire, Avon castle, and would initiate proceedings to enable him to take his seat in the house of lords. He was accompanied by the Countess of Egmont.

Lord Egmont, who succeeded to the title in 1932 when his father, a rancher at Pridia, Alta., for 26 years, was killed in an automobile accident, had been undecided whether to take up residence at Avon castle.

He arrived in England in May. Lord Egmont said the cost of renovating the castle at Ringwood would be so great he had decided to sell it and search for another home or build one.

War Spirit Slackens

Japanese War Minister Says Ardor Is Wearing Down

Tokyo.—Japan's war minister, Lieut.-Gen. Seisiro Itagaki, was quoted as uneasy over a slackening of the nation's war spirit and fearful that munitions supplies were not being replenished sufficiently.

The newspaper Chuang Shogyo reported the minister, speaking before the army chiefs of staff, said:

"The situation is not without some cause for anxiety. The ardor of the nation's blazing patriotic ardor is tending to slow down and wear out."

Touching on the problem of war supplies Itagaki declared "the replenishment of munitions is not being carried out as fully as required owing to the difficulty of obtaining important raw materials and the insufficiency of productive facilities."

Western Air Mail

Daily Service To Be Inaugurated On August 1st

Brandon, Man.—Daily air mail service between Winnipeg and Vancouver would be inaugurated Aug. 1, according to an announcement by W. F. Lough, district director postal service.

The mail planes, flying seven days a week, will leave Winnipeg at 11:30 p.m., C.S.T., and arrive at Vancouver 5:20 a.m., P.S.T. On the return trip they are scheduled to leave at 7 p.m., C.S.T., and arrive in Winnipeg at 3:20 a.m.

Stops would be made at Regina and Lethbridge, Lough said. There will be no stop at Calgary, pending completion of airport improvements there.

Calgary Sheep Awards

Calgary.—Ontario and Manitoba exhibitors obtained the top awards as sheep judging started at the Calgary exhibition and stampede. The leading exhibitors were F. W. Gurney, Paris, Ont., and R. B. Hunter, Winnipeg, in the Shropshire classes, and the Rochester, Ont. Boys' and Girls' Club and E. Crossman, Winnipeg, in the Oxford division. 2264

BRITAIN PLANS TO PROCURE AIR BOMBERS HERE

London.—To enter into negotiations with the Canadian aircraft industry for manufacture of large bomber aircraft in Canada, a new British air mission to the Dominion is being despatched immediately, the House of Commons was informed.

Announcement was made by Sir Kingsley Wood, secretary of state for air, who revealed the mission would be headed by Sir Hardman Lever, from 1917 to 1919 financial secretary to the treasury and later a director of Imperial Airways.

Several weeks ago the first British air mission toured the United States and visited Canada. The work of the first mission, headed by J. G. Weir, was largely exploratory.

Growing importance of Canada in Great Britain's defence plans is indicated by the fact that less than a week ago it was disclosed in the house a Royal Air Force officer is being sent to the Dominion to investigate possibilities for arranging training of R.A.F. pilots there.

Other members of the second mission are marshall of the Royal Air Force, Sir Edward Ellington; F. Handley Page, chairman of the Society of British Aircraft Constructors, and A. H. Self, second deputy air secretary at the air ministry, who was a member of the first mission.

In his statement in the house, the secretary of state for air said the mission would be "for the purpose of entering into negotiations with the Canadian aircraft industry for the manufacture of large bomber aircraft in Canada."

(The announcement was taken in Ottawa as an indication the first air mission had convinced the British air ministry of the ability of Canadian firms to handle orders for large bomber planes.

(When the first mission was in the Dominion, Defence Minister Ian MacKenzie and members of his staff brought the visitors into contact with representatives of 10 manufacturing plants. It was estimated that time that Great Britain might spend about \$250,000,000 in Canada on warplanes over a period of four or five years.)

Penitentiary Changes

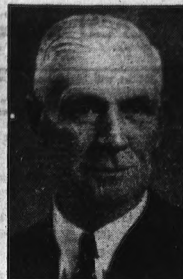

General Ormond To Be Removed From Public Service

Ottawa.—An order-in-council abolishing the position of superintendent of penitentiaries was made public by the acting justice minister, Hon. F. J. Cardin. It will be effective in a month and will remove from public service Brigadier-General D. M. Ormond, whose dismissal was recommended by the recent royal commission on penitentiaries.

Two other orders provided for the transfer of Inspector J. D. Dawson of the penitentiaries branch to the office of comptroller of revenue in Ottawa, and for the appointment of George E. Shortt of Ottawa to the Kingston Inspectorship.

No provision has been made for General Ormond's successor but announcement on this point will be made later in the month when Justice Minister Lapointe returns from his holiday.

PROMOTED

Dr. Charles Macdonald, O.B.E., M.C., who has been transferred from Victoria to Ottawa to assume the duties of associate chief veterinary inspector, Health of Animals Service, Dominion Department of Agriculture. He will have supervision of the work of meat inspection throughout the Dominion.

Alberta Cattle Rustlers

Have Gone Modern And Now Using Motor Trucks

Calgary.—Plans to "run out cattle rustlers from the rangelands and farms of Alberta" were discussed by directors of the Western Stock Growers' Association meeting here.

Rustling is on the increase, it was reported, and greater police aid will be sought in a campaign against rustlers who have gone modern, using motor trucks and slaughtering right at the scene of the thefts instead of as in the old days, driving the cattle to isolated range hide-outs.

The Royal Canadian Mounted Police, commended for their work against cattle thieves, will be asked to assign more men to this branch of the service, especially in districts close to markets.

Ontario Ruling

Men Who Refuse Work On Farm To Be Cut Off Relief Rolls

Toronto.—Premier Mitchell Hepburn announced any able-bodied men on relief who refused work on a farm or elsewhere would be cut off the relief rolls.

In emphasizing that ruling, the premier said he hoped there would be farm work available for all employable married men. Single men are not now eligible for relief.

As has been the case, relief would continue to go to the farm worker's family while the man would be employed to retain a portion of his wages, the rest to go towards relief.

Has No New Plans

British Holds To Proposal For Anglo-Italian Treaty

London.—Despite evidence of Italy's increasing anxiety to hasten the date on which the Anglo-Italian treaty becomes operative, it was learned by the Canadian Press the British government has no new proposals to accelerate ratification.

"Authoritative British quarters hold unless there should be a radical change in the Spanish situation, such as might be effected by an armistice, ratification of the friendship pact must remain dependent upon withdrawal of Italian troops from Spain."

Western Trip Delayed

Prime Minister Has Postponed His Visit Until September

Ottawa.—Prime Minister Mackenzie King said after cabinet council that his long-projected visit to western Canada, including his constituency in Prince Albert, Sask., will be delayed until some time in September.

"I am going to stay right here and try to get some work done," the prime minister said, when asked his plans for the summer months.

At the end of July the prime minister will go to the Fort Henry, Ont., celebration and Aug. 18 and 19 he will join with President Roosevelt in opening the new Thousand Islands bridge at Ivy Lea, Ont., and the new international bridge at Sarnia, Ont. On Aug. 24 he will be host to Lord Stanley, secretary of state for the dominions, who is coming to Canada to open the Canadian National exhibition at Toronto.

By-election in the vacant federal ridings of London and Waterloo South will not be called until autumn, Mr. King said.

SHARPER NOTE AGAINST BOMBING OF BRITISH SHIPS

London.—His Majesty's government have made it plain that they cannot accept as legitimate the bombing of merchant ships by aircraft.

Prime Minister Chamberlain's voice took a sharper note as he told the House of Commons of protests made to General Franco against the bombing of British ships in Spanish waters.

The prime minister hinted that during the summer recess members of parliament may be recalled from their holidays to discuss bringing the Anglo-Italian agreement into effect.

"It might," he said, "be necessary to call the house together again."

This does not mean a special session. When it rises for the summer recess the British house does not prorogue. It merely adjourns and can be called by the speaker without the necessity of a special session.

The British government, the prime minister continued, had made it plain it could not accept the bombing of merchant ships as legitimate. At the same time ships trading in the war zones must accept risks.

"Effective protection cannot be guaranteed unless this country is prepared to take an active part in the hostilities," Mr. Chamberlain continued. "The government, in our view, would not be justified in entering upon such a course, which would result in spreading of the conflict beyond the present limits."

"While any military action is thus precluded, the government is not prepared to acquiesce in a repetition of attacks of a certain character. Hitherto they have always made provisions where a vessel lying by itself has been subjected to deliberate attack by low-flying aircraft."

Attacks on isolated craft, the prime minister added, must be deliberate where the position has been reconnoitred previous to being bombed and the merchant ship has been machine-gunned afterwards.

ADVERSE BALANCE OF TRADE PROVES WORRY TO BRITAIN

London.—Great Britain should insist that the countries whose products she buys also should buy from her, the Federation of British Industries declared. The federation called for energetic steps to deal with Britain's increasing adverse balance of trade.

The statement listed three major difficulties facing Great Britain's export trade:

Refusal of certain foreign countries for which the United Kingdom is a valuable market to reciprocate by buying substantial quantities of British manufactured goods;

Competition in Britain and other countries which buy British goods from products whose manufacture is subsidized by other governments;

Competition from goods produced in countries where the standard of living is much lower than in the United Kingdom.

The federation recommended: The government should emphasize in negotiating with foreign countries that the United Kingdom is unprepared to grant most favored nation treatment for entry of their goods to this country unless the other nation is prepared to reciprocate by buying a reasonable amount of British industrial products.

Falling a satisfactory agreement on the basis of reciprocity, the government should withdraw most favored nation treatment and apply higher duties on the goods of the country in question.

Command Of Sea Vital

Britain Has To Depend On Food Supplies From Abroad

London.—The Earl of Faversham, parliamentary secretary to the minister of agriculture, speaking in the house of lords in behalf of the government, said Great Britain cannot be entirely self-sufficient with respect to food supplies.

Britain imports 77 per cent of its wheat, 50 per cent of its meat and 90 per cent of the butter its population consumes. These figures could be lowered, Lord Faversham stated, but they could not be reduced to nothing.

"We must depend on supplies of food from abroad," he declared. "Command of the sea is as vital to the interests of this nation as it ever has been."

Western Broadcasting

To Erect Powerful Station In Saskatchewan To Serve Western Provinces

Ottawa.—Hon. C. D. Howe, minister of transport, announced an order-in-council had been approved authorizing the construction by the Canadian Broadcasting Corporation of a 50,000-watt broadcasting station in Saskatchewan to serve the prairie provinces.

It will be one in a chain of high-powered broadcasting stations that have already been announced by the broadcasting corporation. Cost of the new station is expected to be around \$250,000. The location of the new station has not been decided.

Guerrilla Fighting

Numbers Wounded In Clash Between Arabs And Jews

Jerusalem.—An undetermined number of persons were wounded in a clash between Arabs and Jews in the mixed quarter of Haifa.

Rifle fire echoed through the streets as the two groups hurled stones and other missiles at each other, but no deaths were reported. Many Jews were evacuating the district.

A recapitulation of casualties since July 5 showed: 66 Arabs and 26 Jews killed; 146 Arabs, 95 Jews and five British soldiers wounded. Many others were wounded in guerrilla fighting.

A World Record

Claimed For Cow At Government Training Farm In Australia

Sydney, Australia.—A world record in milk and butter fat production for 273 days is claimed for Betty Levey, an Illawarra Shorthorn cow, at the government dairy training farm at Berry. Her figures are: 13,639½ pounds of milk and 618.24 pounds of butter fat. The 273-day record of the famous Melba Lady of Barbours, the world's record cow of all breeds, was 13,510 pounds of milk and 587 pounds of butter fat.

RECORD ROUND THE WORLD FLIGHT

Howard Hughes, millionaire movie producer and sportsman, and two of his aides. Hughes is shown centre, with Navigator Harry Connor, left, and Radio Man Richard Stoddard. Photo was taken just before the flight commenced.

Canada's greatest need today is a common-sense government in Alberta.

A local school boy, when questioned, answered that "Fatal diseases are the worst."

The great I Am Alberta prophet is dreaming differently at times. Sometimes he imagines himself a Goliath.

Girls used to be knocked senseless by cave men, but Jimmy now claims that in some cases this is no longer necessary.

Miss L. Chatfield, of Brooks, is a patient in hospital at Bassano. Miss Chatfield was a former resident of Frank and Blairmore.

They're talking now of celebrating the "bride victory on August 22nd, August 22nd, 1935, should be celebrated as a sad day for Alberta, and there is no reason why the government should not set aside a small sum, say about a million dollars, to help the poor unfortunate celebrants.

A heavily laden truck smashed through the bridge crossing Todd Creek, about ten miles north of Lund, and near the old Livingstone postoffice, last week end, leaving the bridge a complete wreck. Traffic to the North Fork has therefore been directed another mile north by Staunton, then a mile east. Material for a new bridge is being placed on the grounds, and it is expected, will be open for traffic in about two weeks.

Provincial crop report, contained on five foolscap-size typewritten sheets and sent out by the department of agriculture, Edmonton, to the press of Alberta, seems to arrive on time for the other side of the sheets comes in very handy for note paper. Newspapers are expected to co-operate with the government to the extent of publishing this matter gratis, while the government on the other hand avails of every opportunity to impede the progress of the press.

Every mother has the best boy; the worst boy lives next door.

Bill Warhus has returned from Calgary, much improved in health.

As we go to press, we had a look at our wading (fishing) boots, and they are heading southeast.

James Allan, of Coleman, has been a holiday visitor with his uncle and aunt at Leslieville, Mr. and Mrs. A. L. Menzies.

The Hillcrest Fish & Game club plan on holding an outing and fish competition near Race Horse creek on Sunday.

A transient motorist, who in all likelihood wished to avoid work, stopped at the Crows' Nest Pass Motors on Monday and ordered elbow grease.

The annual federal convention of the Benevolent and Protective Order of Elks of Canada and Newfoundland will be held in Lethbridge next week, July 27-28-29.

Some local folk were up bright and early Wednesday morning to hear the broadcast of His Majesty the King's speech at the unveiling of the Australian War Memorial in France.

Calgary citizens voted Wednesday for the building of a \$1,350,000 oil refinery in East Calgary, and the borrowing of \$250,000 from the Dominion government for self-liquidating works.

At the recent Toronto Conservatory of Music examination, held in Edmonton, Master Ian and Miss Ruth Arrol, son and daughter of Rev. E. B. and Mrs. Arrol, of Blairmore, formerly of Bon Accord, took honors in Grade VII. piano, while Miss Elsie Arrol took honors in Grade III.

Mr. and Mrs. E. C. Anderson and Mrs. E. B. Winter, of Sioux Falls, South Dakota, are visiting with Frank and Mrs. Beebe for a few days. Mrs. Anderson and Mrs. Beebe are sisters. Motoring up from the south, they found roads in fine shape, and thoroughly enjoyed their trip into Canada.

The average tourist who disregards our speed limits and feels like passing through town at a rate of sixty or more, is not a good citizen anyway. Probably the quicker he passes through and is gone the better for us. Some day they'll get to realize that such is the public's opinion of them.

The remains of Mrs. Julia Zimka, who died at her home on Monday, were laid to rest in the Catholic cemetery yesterday, following Requiem Mass at St. Anne's Catholic church at 10:30 a.m. Mrs. Zimka is survived by three sons and two daughters. Her husband predeceased her several years ago.

Bills turned out from the job printing department of The Enterprise announce the annual clearance sale of the F. M. Thompson Co. It will arrive at the home of every householder, and will be preserved, simply because it is a printed sheet. We would suggest that local folk patronize the local store on this occasion. Many attractive bargains are offered, and the store in general has assumed a bargain-offering appearance. The sale opens Saturday, the 23rd, and will continue for two weeks.

Not only in Alberta are Social Crediters having tough sledding, for over in England and Ireland the Social Credit party has broken with Major C. H. Douglas, the big expert. A meeting called by a friend of the major's to welcome George F. Powell, Alberta ex-convict, and to acclaim the Saskatchewan election result an unprecedented triumph for Social Credit, ended riotously. They refused to give Powell a hearing and renounced Douglas. John Hargrave is now the national leader.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors, accidents, parties, local news, etc. Please items in to 11 or hand them in at The Enterprise office no later than Wednesday evening.

Archie Corrie, of Michel, was a visitor to Blairmore last week end.

FOR SALE—Beatty Electric Washers may be had for balance owing. Apply to Box "E," care of The Enterprise.

Three carloads of fat stock went from Lundbreck to Winnipeg and Toronto last week.

Seven autos were reported stolen from the Calgary Stampede parking grounds on Friday night last.

Six members of one Trochu family recently purchased six Massey-Harris tractors for farm work.

Bill Glendenning, night manager at the Cosmopolitan hotel, spent last week end in Calgary and helped close the Stampede.

A bunch of real skunks paid Blairmore a visit last week end, and caused considerable worry to people in all corners of the town.

An Alberta exchange remarks: America may need a good five-cent cigar, but what Alberta needs is a good \$5,000-a-year attorney general.

About the biggest factor of today is Alberta's attorney-generalship. It has been proven so over and over and still the "boss" doesn't seem to know enough to quit. In fact, school teachers were never known to act that way before.

A programme of expansion and development at a cost of between \$125,000 and \$155,000 is planned for the Regina plant of General Motors of Canada. Reopened only last December, the Regina factory is now producing sixty cars per day, with a capacity of 100 cars.

The marriage took place in the United church manse at Cranbrook on July 1st of Miss Gwendolyn Arabella Bryant, elder daughter of Mr. and Mrs. Arthur Bryant, of Kimberley, to Robert, younger son of Mr. and Mrs. Robert Dicken, also of Kimberley. The young couple spent their honeymoon in Vancouver.

Since moving to Macleod, Rev. A. E. Larke has made at least two trips to the foothills in charge of a number of young people. On one trip, Mr. Larke and several of his party journeyed on foot from the Young ranch on the South Fork over the hill to Byron Creek and back, then continued east through Beaver Mines, Pincher Creek and to Macleod by car.

Five new luxury liners to coast in the neighborhood of \$55,000,000 are being planned for the C.P.R., to be built during the next three years. The plan provides for the replacing of the Empress of Russia and the Empress of Asia with two ships of 25,000 tons with speed of 23 knots, and a sister ship to the Empress of Britain.

The marriage was solemnized in Calgary on July 9th of Miss Frances Mae, third daughter of Mr. and Mrs. J. F. Smith, of Lundbreck, to Norman Kylo, son of Mrs. E. Frisvold, of Chipman Creek. Rev. Father Donovan performed the ceremony. The newly married couple will reside in Little New York, Turner Valley, where the groom is employed with the Canadian Arco Oil Well Co.

There's nothing too good for "Poor Charlie," despite all Aberhart's efforts at taxation. There isn't an outfit in the Crows' Nest Pass that's putting forward a bigger effort in the way of improvement in premises. Recently, the front appearance of the Union Meat Market and the Chardon premises have been brightened by a new coat of whitest paint, while the front of his Blairmore Motors' garage, which had already been made attractive by painting, etc., has been made more so by the addition of elaborate window boxes. Atta boy, Charlie!

The stork visited Blairmore twice last week end.

It must involve a tremendous lot of study to bring out ultra vires legislation.

Mrs. James Milne, of Taber, is a holiday visitor here with her daughter, Mrs. H. Upham.

If Aberhart would arrange to put all the unemployed at work, they'd be in a position to pay him a dividend.

The little twelve-year-old daughter of Rev. and Mrs. E. B. Arrol was organist for the evening service at the United church last Sunday.

Aberhart complained of a sore throat, when facing the Bible Institute congregation on Sunday last. May be it was the "will of the people."

L. A. DeWolfe, of Truro, Nova Scotia, succeeds Dr. G. W. Kerby, of Calgary, as president of the Canadian National Federation of Home and School Associations.

Henry Ford has patented a new type of passenger automobile, with the motor mounted over and parallel to the rear axle. No indication is given whether he proposes to make the new type of car.

Mr. and Mrs. Joseph Wolstenholme, Mrs. Fraser, Miss Lena Fraser and Miss Lillian Knapman made a holiday trip by motor to Banff via the western route through Cranbrook and back through Calgary.

"Gone With the Wind"

Are you a "Gone with the wind" advertiser?

Does your advertising get as far as the front porch, only to be caught by a gust of wind and gone to clutter up your yard or your neighbor's?

This "Gone with the Wind" advertising falls in its purpose to get into the home, to be interesting enough to be read, to be convincing enough to sell the merchandise you offer.

"Gone with the Wind" advertising fails to serve you properly, and costs you too much.

In modern merchandising, time is money, and rapid turnover is good business. "Into the Home" Newspaper Advertising fulfills its purpose, works quickly, costs less because it sells more.
